

NO RESCO helps customers reduce energy project costs and expand scope by identifying applicable tax credits, grants, utility rebates, incentives, and innovative financing.

Are you struggling with funding for energy infrastructure modernization? Worried you are missing out on state and federal grant opportunities? Interested in learning more about changes to tax laws that enable local governments to receive tax credits from the federal government? Wonder how the Justice40 Initiative may relate to your community? Want to participate in decarbonization and electrification but unsure where to start? NO RESCO can help you leverage available grants, tax credits, and incentives to benefit your community while navigating the energy transition.

NO RESCO helps customers create sustainable buildings, campuses, and communities that address modern energy infrastructure challenges while saving energy and optimizing budgets. Our expert grants and incentives team can uncover applicable grants and incentives to maximize the cost-effectiveness of equipment upgrades and installations. We have negotiated and secured more than \$185 million in utility rebates, grants, federal tax credits, and other effective financing programs for our customers. Contact us today to see what opportunities we can secure for you!

Opportunities

NO RESCO has expertise to help you navigate federal, state, and local grants, incentives, and financing strategies such as:

- Inflation Reduction Act (IRA)
- American Rescue Plan Act (ARPA)
- Infrastructure Investment & Jobs Act (IIJA)
- Section 179D tax incentive
- Greenhouse Gas Reduction Funds (GGRF)
- Assisting Federal Facilities with Energy Conservation Technologies (AFFECT) grants
- DOE Title 17 program
- Green financing strategies
- Utility rebates and financing
